

WBCCEDP Algorithm for Cervical Screening / Pap Abnormalities*

ASC-US- Atypical Squamous Cells of Undetermined Significance
 LSIL-Low Grade Squamous Intraepithelial Lesion
 HSIL-High Grade Squamous Intraepithelial Lesion
 ASC-H-Atypical Squamous Cells-Cannot exclude High Grade SIL
 AGC-Atypical Glandular Cells of Undetermined Significance

CIN I-Mild Dysplasia
 CIN II-Moderate Dysplasia
 CIN III-Severe Dysplasia
 CIS-Carcinoma In-Situ
 HPV-Human Papillomavirus

Algorithm reviewed and approved by the Wyoming Breast and Cervical Cancer Early Detection Program Medical Advisory Council July 2012.

* Pap screening for women age ≥ 21 only (no one under 21 can be screened through WBCCEDP)

**HPV test should be performed only on women age ≥ 30 ;

Note: LSIL-H is not a designated Bethesda Category but it may be indicated by a pathologist if HSIL can not be completely ruled out.

Note: This algorithm is not for use with adolescents, pregnant women or other special populations/circumstances; refer to ASCCP Consensus Guidelines for these populations.

Revised August 2012
